

Please reject the NAB's petition 04-160. I am an OTR Truck Driver and the Instant Traffic & Weather channels have become a very useful tool to truck drivers all over the country. I live around the Chicago,Il area and drive thru there frequently. The Chicago station tells drivers information that the local am/fm stations don't report like traffic jam locations and accidents so that we can plan ahead for either a delay in delivery or pick up of product. I pay for the service and I feel XM Radio is not going to hurt the local am/fm stations in any way by letting XM keep the Instant Traffic & Weather stations for our use.
